

TWN INDUSTRIES, INC.
**WATER TRANSFER
 PRINTING**

Basecoats & Topcoats

U.S. Paint®

- DTP Plus Basecoats**
 Currently stocked in two shades: Fall Tan and Galaxy Black. With an unlimited dip window basecoats work great with the water transfer printing on everything from automotive interiors, firearms, to all-terrain vehicles. The Direct To Plastic (DTP) basecoats are 1k, air or forced-air dry products that are designed to stick directly to TPO, PP, ABS, glass filled resins, treated aluminum and many other substrates.
- Insignia Soft Touch ES (4-7 Gloss) PK3101**
 A combination of toughness and a smooth soft feel, gives this coating a unique place in the market. Its durability and ease of use allows it to be used for most any applications where a soft feel is desired. A two-component polyester based Soft Touch clear coat that passes 30 minutes with 100% Deet and other corrosive solvents.
- Enhanced Low Gloss Clear (5-10 Gloss) Kits AF3072**
 Designed for the power sports industry, this clear gives a very smooth surface while bringing along great UV protection and long term weatherability for products that will be exposed to the elements. With high sag resistance and the ability to quickly build film thickness, it's an easy clear to apply.
- Flat Clear (1-3 Gloss) Kit AF3089**
 Developed with the firearm and bow markets in mind, this clear has great chemical and wear resistance while giving the desired flat appearance.
- High Solids Clear (90+ Gloss) Kit J3507**
 A high solids clear that has a gloss level that leaves the part with a wet appearance. The high solids means it will build film quickly while being sag and run resistant due to tailoring of the formula. It's designed to be sandable and buffable to help ensure a beautiful part.

Direct To Plastic Basecoat :
 No adhesion promoter required.
 Industry approved clearcoats :
 Good for automotive, marine,
 motorcycle, powersports and more.
